Product Description

The Angle-Izer is the ultimate template tool for creating professional layouts in tiles, brick pavers, lumber and laminate. The innovative, four-sided mechanism quickly forms to the shape of your work area, which can then be used as a stencil for cutting your work piece. For professionals, the Angle-Izer can be used to make bulls eyes, arches and plumb cuts on roof joists. For the do-it-yourselfer, use the Angle-Izer to help lay a brick patio or tile floor. The possibilities are limitless with the Angle-Izer! • Versatile layout tool for creating complex shapes and angles. • Great for making repeat cuts on arches and joists. • Open center channel for marking brick, tile, lumber and laminate. • Arms are calibrated in both inches and millimeters. • Glass-filled nylon for added strength and flexibility.
